# SEVERE & DIFFICULT TO TREAT ASTHMA

WHAT TO DO WHEN THE BASICS FAIL

This free CME activity will help guide health professionals in the care of severe asthma in children and know when to refer to a pediatric pulmonologist.

## LEARNING OBJECTIVES:

1. Define severe vs. difficult to treat asthma.
2. Describe when a primary care physician should refer to the pediatric pulmonologist.
3. Identify when to “go back to the drawing board” to determine if there is an alternative diagnosis for severe asthma.
4. Accurately diagnose asthma comorbidities and identify the appropriate treatment for each patient.
5. Describe what a multidisciplinary team does to add to the management of severe asthma.
6. Identify what biologics are available for asthma and when to use them.

### SPEAKER:

Lauren, Benton, MD  
UA College of Medicine  
Pediatrics

## ACCREDITATION STATEMENTS:

### ArMA

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Arizona Medical Association (ArMA) through the joint providership of Tucson Hospitals Medical Education Program (THMEP) and The Southern Arizona AHEC at El Rio Health. THMEP is accredited by ArMA to provide continuing medical education for physicians.

THMEP designates this live activity for a maximum of **1 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

### AAFP

This activity has been reviewed and is acceptable for up to **1 Prescribed credit by the American Academy of Family Physicians.**
